

ANNUAL DECLARATION OF INTERESTS (ADoI)

(Please note that high quality of scientific expertise is by nature based on prior experience and that therefore having an interest does not necessarily mean having a conflict of interest)

Name: STEGEMAN, Jan Arend

Title: Prof

Profession: Chair in Farm Animal Health

Current EFSA involvements: Member-AHAW Panel 2015-2018 (AHAW), Member-Biological Relevance (SC), Chair-M-2014-0079 Vector-borne diseases (AHAW), Chair-M-2015-0079 Avian Influenza (AHAW), Member-PROMETHEUS (PROmoting METHods for Evidence Use in Scientific assessments) - Deliverable 2 "Analysis of methods for dealing with data and evidence applied by EFSA" (AMU)

Nature of Activities	Period	Organisation	Subject matter
I. Economic interest			NO INTEREST
II. Member of a managing entity or equivalent structure			NO INTEREST

III. Member of a scientific advisory entity	03/2013 - now	-Name: Deskundigengroep Dierziekten	Chair of independent committee to advise Dutch ministry of Economic Affairs on matters associated with contagious animal diseases. This group advises upon request or upon its own initiative and is totally independent from the government and industry, but a way for the government to obtain independent advice. My involvement is 6 meetings/year and the work takes a total of 100 hours. The money involved is paid to Utrecht University. Important is that the group acts independent, so there is absolutely no influence of the ministry or any industry on the advices given by this group (acts like EFSA in this way). The contagious diseases of relevance to this group include Avian Influenza, but at current there is no request for an advice on Avian Influenza to this group. Money received for this task goes directly to my employer Utrecht University, so in that sense it is part of my normal job. There are no personal financial incentives involved.
	05/2012 - now	-Name: Gezondheidsraad	Member of the Dutch National Health Council, an independent advisory council advising the Dutch Ministry of Health upon request. Time involved is 1-2 meetings a year and total time spent 2 days/year. Advices of this committee are absolutely independent of any influence from ministry or industry (acts like EFSA). So far there has not been a request for an advice regarding Avian Influenza. Money involved goes directly to my employer, Utrecht University. So in that sense it is part of my normal job and there are no private financial incentives involved.
	12/2011 - 06/2013	-Name: Gezondheidsraad (Dutch Health Council)	Committee on the risks of living near industrial farms. Three meetings, total time spent 3 days.
	03/2011 - 08/2011	-Name: Gezondheidsraad	Advisory committee on antibiotic resistance related to farmed animals. Total time 3 meetings, time spent 3 days in total
	01/2010 - 12/2010	-Name: Q-Fever Evaluation committee	Member of the independent committee to evaluate the measures taken in the Control of Q fever in The Netherlands. In total I attended 12 meetings, total time spent 12 days
IV. Employment	05/2001 - now	-Name: Utrecht University	Chair in Farm Animal Health. Teaching topic of Veterinary Epidemiology and Research in epidemiology of infectious animal diseases
	04/2009 - 03/2011	-Name: ULP (University Practice of Farm Animals)	Supervisor of the director. ULP is the ambulatory farm animal clinic of the University (100% owned by the University), but has a separate legal status. By function the chairman of the Department of Farm Animal Health is the supervisor of the director of the clinic, in order to ensure quality of the teaching.

V. Occasional consultancy	01/2012 - now	-Name: Dutch Animal Health Service	<p>Member of Committee that advises on the research priorities of the Dutch Animal Health Service. Since 2012 these research priorities have been : 1) development of diagnostic platforms that can be used on farms (on site diagnostics), 2) development of markers for robustness in animals, 3) gut health in chickens en 4) development of new diagnostics for antibiotic resistance.</p> <p>ad 1) aimed at production diseases in general, but the advise does not include specific diseases, because it is directed at the technique itself, it will certainly not include notifiable diseases (prohibited for AHS, task of CVI) and also does not include vector borne diseases and there is no plan to include them;</p> <p>ad 2) does not include specific diseases, longevity of cattle is the outcome parameter;</p> <p>ad 3) does also not include specific diseases, because here the challenge is to define a healthy gut (in contrast to gut diseases);</p> <p>ad 4) this aims at identifying new techniques that can more quickly (than bacterial culture) identify antimicrobial resistance in order to chose the right treatment more quickly.</p> <p>In my opinion there has been no overlap between this consultancy and my work for EFSA, neither as a panel member, nor as a member or chair of a WG. To phrase this specifically for the chairing: There has been no overlap with the mandate on Rift Valley Fever, AHS does not have any activity in this area nor is planning one. The consultancy also has never had any involvement with bovine TB. Moreover vector borne diseases have not and will not be part of the consultancy, because that is restricted to the topics listed above and will be for the coming year (by December 2015 the contract will be reevaluated or can be stopped). This advisory task is part of an exchange of services between faculty of veterinary medicine (and consequently actually part of my normal job) and Dutch AHS.</p> <p>Total time spent: committee meets 4-5 times/year, total time spent (including travel and preparation) 5 days/year.</p>
VI. Research funding	01/2011 - now	-Name: Private Organizations	The research (co-)funding I received from the private sector in the latest full budget year, and for the areas covered by the Panels, does not exceeds 25% of the total annual research budget that is managed by me
	06/2009 - 06/2013	-Name: CVI	PhD student African Swine Fever PhD student Bluetongue
	01/2008 - 12/2012	-Name: Dutch Government	Epidemiology of Avian Influenza in vaccinated populations
	01/2007 - 12/2011	-Name: Dutch Government	Avian Influenza in Indonesia
	05/2008 - 12/2010	-Name: CDC Atlanta	Exposure of humans to Avian Influenza
	03/2006 - 12/2010	-Name: Dutch Mastitis Council	Control of mastitis in dairy cows
VII. Intellectual property rights			NO INTEREST
VIII. Other memberships or affiliations	09/2011 - now	-Name: Stichting Geborgde Dierenarts	This independent foundation evaluates whether the quality assurance of Dutch Veterinarians is carried out in a correct way.
	09/2011 - 12/2012	-Name: Stichting ISVEE13	Foundation for the Organisation committee of the 13th International Symposium of Veterinary Epidemiology and Economics, to be held in Maastricht The Netherlands from 20-24 August 2011 (chair)
IX. Other relevant interest	01/2009 - now	-Name: Preventive Veterinary Medicine	Associate editor of Preventive Veterinary Medicine, task is evaluating submitted manuscripts
X. Interests of close family members			NO INTEREST

I hereby declare that I have read both the Guidance Document on Declarations of Interests and the Procedure for identifying and handling potential conflict of interests and that the above Declaration of Interests is complete.

Date: 06/10/2015 Signature: SIGNED
